## Assignment 7

- Write a code to book a ticket at <http://newtours.demoaut.com>.  
A screenshot should be taken on every page as the control progresses from one page to next page irrespective of the fact that the test case is passing or failing (use TestNG assertion to verify this). As the work on 1 page gets completed take a screenshot.
- Search on google how to include a timestamp along with the name of screenshot. If u don't include a time-stamp, all the screenshots will be overwritten. Figure out how to overcome this?
- Create a program to go to <https://www.dropbox.com/>. print the title of the page 5 times. Each time a title is printed, browser should get closed. To get the title again, the browser should open again.
