Version 1.0

Assignment

Problem Statement 1

- Write a program in which the elements are entered dynamically into an ArrayList then remove the elements from it and while deleting elements print the elements to console

Problem Statement 2

- First set the elements in HashMap then separate the key and the value. And also show each key and its corresponding value as an output.

Problem Statement 3

- Develop a program in which a user enters 2 separate numbers from the keyboard and the program must display the result of Addition, Subtraction & Multiplication separately on the console
